## **Competition rules of Ordo.**

### **I. General regulations.**

Ordo - one of the most spread games of Kyrgyz, survived from the ancient times till nowadays. The word «ordo» itself means «General Headquarters of khan, khan palace». The game reproduces the fight to conquer the General Headquarters.

Ordo is a kind of a military map, with the help of which warriors used to learn how they can defeat the enemy. Drawn circle on the ground meant the territory of state and the rivals used to work out the plan of the battle. Knocking the khan out of the circle would mean dethroning of the ruler.

In the basis of this game lies the skill of leading the righteous inner policy, which is characteristic to the compliance of caution being already inside of the circle, i.e. at the power.

### **II. Rules of the national game ordo.**

10 people take part in the competition: 7 players, 1 substitution, coach and team leader.

Game starts with the draw. For this each captain takes one left alchik. Throwing them above the head judge determines the team which starts the game. The game starts those whose alchik felt on «aykur» or «taa» side.

The game lasts for 2 hours. It starts with the solemn greeting of the teams.

For each player 5 alchiks are put and each has a right of three strikes. If a player knocks out the alchik, then he continues his throws until he is failed. During the game player should properly step on the circle line, in each case toe should be directed to the center of the circle. He must continue the game with the tompoy that he entered the circle. If a player at his strike or click broke the rules by taking another tompoy or if he wronged, then by decision of the judge he quits the game. If during the game, the players of one team knocks out all alchiks and the khan, then turn gives to another team. If the second team knocks out all alchiks and khan too, then game finishes with the draw and it starts again. If the second team couldn't knock out all the alchiks and khan, then first team wins and they acquire "malak". Team got "malak" cannot take any of alchiks.

If during the given time khan was knocked out and the game would be started again, then alchiks of the losing team counts in the following way:

- 5 alchiks – three full games;
- 4 alchiks – three games by knocking;
- 3 alchiks – two full games;
- 2 alchiks – one game by knocking;
- 1 alchik – one game.

Knocking out is given only to one player.

In the team championship places are determined by the points. Team scored the maximum points takes the first place.

## V. Techniques of the game.

Atuu (name of the method) – “ura atmay” (a strike made out of a circle); “baychertmek atuu”(strike like baya, one of the striking types); “kynkay atuu” (striking sideways); “boorgo alyp atuu” (strike from the chest); “toorumak tooruu” (strike from the rear).

“Ura atmay” – for the strike with the alchik player steps the line with his toe in direction of the center of a circle. If alchik knocked out without this rule, then alchik stays in the center and doesn’t go into the general treasury.

“Baychertmek atuu” – this method used for striking from the top, in order to hit the center, when alchik is at 1-1,5 meter distance from the line. At this strike a player also need to turn his toe to the center.

“Kynkay atuu” – this technique used when a player knocks out the alchiks lying near, wherein toe must be directed to the centre.

”Tooruu” – strike from the rear. “tooruu” technique has complicated and simple types.

Simple “tooruu” – at this technique heel of the left foot must be on the line, right foot stays back, left hand moves back, strike performed bowing, and, if at that time alchik goes through the inner lchiks, tompoy goes out of the line wherein heel was taken from the line, or tompoy touched the leg of a player, and also, if a player picked up a tompoy without lowering his arm and leg, then strike is not counted. If a player after “tooruu” strike couldn’t hit the circle, then he must move one step left or right from the striking place and commit a strike to the far alchik. There must be striking that player who was knocking down the alchiks.

Complicated “tooruu”. Complying rules of the simple tooruu, with the help of tompoy a player need to direct into the alchiks’ side in the circle. If tompoy stays in the circle, then he has right to click, if not, he can continue until he missed.

“Boorgo alyp atuu” (strike from the chest) – method has simple and complicated types.

Simple type – in this technique a player knocking out the alchiks puts his left foot properly on the line, left arm press to his chest and knocks out the alchiks nearby the line, here it won’t be a mistake if tompoy goes out of the line.

Complicated type – tompoy must be directed into the alchiks in the circle and a player must knock out alchiks out of the line. Knocked out alchik must go out from the near line, he must go through the alchiks inside of a circle.

Strikes “chertuu” – “clicking”.

“Birden chertuu” – click by one, “karmap chertuu” – hold and click, “suro chertuu” – click by gathering, “koe berip chertuu” – click loosing, “top chertuu” – click of a group and “khan chertuu” – click of a khan, “sabap chertuu” – click by whipping.

“Birden chertuu” – when a player hit the circle, he can apply click strikes, at this strike left leg must be parallel to the line, connecting two extreme alchiks, other leg mustn’t cross the line. After this, moving or not moving a knee, player must by clicking strike one alchik, stand and again strike another alchik. If this technique repeated several times, then it is called “birden chertuu”.

“Karmap chertuu” – a player enter the circle, knocks out by clicking one alchik, sits and knocks out one more alchik. At this time tompoy mustn’t lay separately (“ara bök”). After this a player must knock out alchik, lying aside, wherein holding tompoy vertically or horizontally, third alchik knocks out by click too. At the strike “karmap chertuu” at least three alchiks must be knocked out.

“Suro chertuu” (“jamap chertuu”) – at this strike a player hit the circle knocks out alchiks one by one in such a way that they need to be grouped. At this click tompoy mustn’t get off the ground, hand mustn’t touch the ground, and, if click was not straight but sideways, strike is not counted.

“Koe berip chertuu”. This technique used when tompoy is appeared near the separate lying alchik, in this case a player knocks out this alchik to the side of majority of alchiks, at this alchik must be knocked out of the circle, and tompoy must attach to other alchiks. This method may be applied several times, but provided that one alchik must be knocked out of the circle and tompoy attach one alchik in the circle.

While performing all types of clicking, first player need to raise his knee and then his foot.

“Top chertuu” (“top uruu”). A player can enter the circle, strike one alchik, stand, and then can strike the group of alchiks. Alchiks are considered a group if more than 5 alchiks lay close to each other in the middle of the circle. At the strike to group, strike with tompoy performed without moving a knee. If while striking alchik touched a player, tompoy was got off the ground or knee and feet were moved, strike is not counted.

“Khan chertuu”. It is allowed to strike khan during the game. At the strike to khan knee doesn’t move too. When there are only five alchiks left in the ordo and knocking out of the khan starts, first starts the representative of the playing team. Players knocking out the khan can change. Team who has knocked out the khan takes together with the khan three alchiks, other team takes two alchiks, and team taken the khan starts new round. It is obligatory for khan to be knocked out from the center.

“Sabap chertuu” – whipping click. A player can use this technique when alchiks are closely placed. He can strike at the distance of one hand, wherein it is permitted to move his knee, but it is necessary to knock out at least three alchiks.

At all the clicking methods necessary thing is to sit right, hand shouldn't touch the ground, tomboy shouldn't get off the ground, knee shouldn't cross the line which connects two far alchiks, between the feet and the knee of bent leg there shouldn't left alchiks.

“Ichke tushuu”. Using the strikes like “bay chertmek”, “tooruu”, “kadamyk kadoo” there is chance to get into the circle. Tomboy, when it reaches the circle, should attach to one of the alchiks or khan, distance between them must be 40 cm. while a player being inside the circle won't the judge to measure, the distance won't be measured. Distance between tomboy and alchik measures, and, if a player can reach, alchik can be knocked out. When a player enters the circle, there should be nobody inside the circle except him and the judge. Captain of the team can enter only with the permission of the judge.

“Kadamyk kadoo” – strike to near alchik. “kadamyk kadoo” technique applied when a player is inside the circle. Alchiks being close to the circle line is considered to be “kadamyk”. The distance between alchik and “kadamyk” and leg on the line must be so, that a player could twist with his tomboy.

Alchik necessarily must be knocked out through the line. Tomboy together with the alchik can be directed into two sides of a line. If tomboy and alchik directed into one side, game is not counted.

While knocking out close strikes can be applied – “kadamyk kadoo”, but toorumak “strike from a rear” is forbidden.

“Ara bök” – the distance between tomboy and alchik is more than 40 cm. Situation, when tomboy is far from the alchiks is called “ara bök”. If the distance is not coincide, strike is not allowed, if it is, it is possible to continue the game. The distance is measured by a judge with the consent of a player being in the circle.

## **VI. Forbidden actions, loss of the right for a strike.**

A player is forbidden to step twice the circle line while knocking out the alchik. While playing it is forbidden to shift tomboy from one hand to another or make touch two hands.

Forbidden to strike sideways not knocking out alchik.
